

Job ID#: SW-DC01SDV (reference in all correspondences)
Position Title: .Net/SharePoint Developer (Solutions Consultant)
Location: Irvine, CA

- We are seeking both Full-time and Contract-based (1099) interested parties

The Solutions Consultant is to apply a detailed knowledge of Microsoft Information Worker products, SharePoint Portal Server and Windows SharePoint Services (WSS) to assist prospects and customers in matching the technology to their needs. .Net/SharePoint Developer will implement and develop the latest .Net technologies including SharePoint. Candidate must have understanding and production experience in analyzing, developing, and deploying solutions using .Net technologies. This includes a strong technology focus on portals, business intelligence, enterprise application integration using .Net based architectures including XML, SOAP, Web Services, and business productivity applications using Microsoft Office 2003 and related technologies.

Position Duties

- Assisting customers/partners with making architectural decisions as they determine how they would design and build their solutions on MS Information Worker and SharePoint
- Ability to mentor developers through enterprise custom application developments of the SharePoint Object Model
- Create technical documentation of installation/configuration procedures
- Building demonstrations of capability and documenting how our customers can create similar solutions

Position Requirements

- Knowledge on developing, configuring web parts for SharePoint
 - Demonstrate working knowledge of physical and logical server architectures for SharePoint Portal Server
 - Significant architectural experience using Microsoft .NET, Windows DNA and related technologies
 - Demonstrate high degree of initiative and self guided work management
 - Demonstrate strong desire to develop new technical knowledge and professional skills on a continual basis
 - Excellent communication skills with the ability to convey the proper message to both the Business and Technical audiences
 - Must have practical project experience in development of portal applications
 - Expert level technical skills with .NET development technologies
 - Experience with Commerce Server, Content Management Server MS Active Directory/Exchange, Project Server, and BizTalk a plus
 - Experience with Project 2002 a plus
 - Minimum 5+ years of development experience in large scale enterprise application integration
 - Experience in pre-sales consulting with a successful sales team (preferred but not required)
 - *MCSO or MCSO for .NET or .MOSS 2007
 - *Bachelors degree (or equivalent work experience or specialized training) in Information Technology (IT), Computer Science (CS), Software Engineering, or related discipline
- *Employer will consider reference able projects in lieu of Certifications or Degree

DynTek is an Equal Opportunity Employer. Employment will be contingent upon the successful completion of a background check.
