

Infrastructure & Data Center Solutions

DynTek is a thought leader in the architecture, design and implementation of solutions that serve as the foundation for your organization's IT environment. From switching/routing and unified communications to virtualization and storage, our certified specialists have field tested expertise in the technologies you rely on to run your business.

More than a Business. More than a Job. A Passion.

Yes, we thought the CCIE lab and VCDX test were fun. We actually recreate them on the weekends just for laughs. We virtualized the servers in our home lab and have a SAN in the basement just to be safe. We live it. We breathe it. We love it. Technology...not a job, a way of life.

When it comes to building the foundation for your critical business systems..can you afford to not get it right the first time? **The best run systems start with the best designs.**

Advanced Networking & Data Center Infrastructure

Nexus Switching & Performance Routing, Load Balancers, LAN/WAN Optimization, Wireless, Voice & Unified Communications, Network Analysis

Network Security

Firewalls, Penetration Testing, Intrusion Prevention, AV, Event Correlation, Single Pane Management, 2-Factor Authentication

Server Virtualization

Capacity Planning, P2V Disaster Recovery Strategy, Cloud Migration, Management Implementations

Servers & Storage

Cisco UCS Performance Hosts, Server & Storage Consolidation, iSCSI Solid State, Fibre Channel

The DynTek Advantage

DynTek specializes in the planning, design, implementation and optimization of your IT Infrastructure and Data Center environment. Our certified team of technical specialists are fluent in the latest technologies from industry leaders such as Cisco, Microsoft, VMware and McAfee, and are equipped with field tested deployment expertise and design/architecture best practices.

Optimizing legacy elements and growing the reference architecture to create an infrastructure that is flexible and resilient while meeting business demand is the cornerstone of DynTek's Infrastructure & Data Center solutions.
