

Powering Productivity: Microsoft Office SharePoint 2007

DynTek, a Microsoft Gold Partner, can help you amplify the impact of the people in your organization with a business productivity infrastructure built on the 2007 Microsoft Office system-software that streamlines the way you and your people do business.

Leverage Microsoft and DynTek to:

- Simplify working together
- Secure and manage content
- Find information and improve business insight

A core component of this business productivity infrastructure is Microsoft Office SharePoint Server 2007 (MOSS 2007). Your organization can use MOSS 2007 to facilitate collaboration, provide content management features, implement business processes, and supply access to information that is essential to organizational goals and processes.

Microsoft Office SharePoint Server 2007 Capabilities

Microsoft Office SharePoint Server 2007 provides a single, integrated location where employees can efficiently collaborate with team members, find organizational resources, search for experts and corporate information, manage content and workflow, and leverage business insight to make better-informed decisions.

Collaboration

Allow teams to work together effectively, collaborate on and publish documents, maintain task lists, implement workflows, and share information through the use of wikis and blogs.

Portals

Create a personal MySite portal to share information with others and personalize the user experience and content of an enterprise Web site based on the user's profile.

Enterprise Search

Quickly and easily find people, expertise, and content in business applications.

Enterprise Content Management

Create and manage documents, records, and Web content.

Business Process and Forms

Create workflows and electronic forms to automate and streamline your business processes.

Business Intelligence

Allow information workers to easily access critical business information, analyze and view data, and publish reports to make more informed decisions.

DynTek has developed methodologies to address the Analysis, Design, Proof of Concept, Project Planning and Full Scale Deployment and Operations of MOSS 2007.

- Exceptional vendor/ industry certified consulting team
- Over 20 years of experience integrating time-tested solutions and emerging technologies
- Full knowledge transfer
- Multi-disciplinary expertise in security, application delivery, storage and virtualization and advanced networking

SUCCESS STORY

As a 62-year-old design firm, Wimberly Allison Tong & Goo (WATG) understands the importance of having established processes for project communication and collaboration. Upon learning about Microsoft Office SharePoint Server 2007, WATG decided to upgrade its Office SharePoint Portal Server 2003 environment, develop a solution for department and project team portal sites, and adopt Microsoft Office Groove® 2007 for ad hoc and offline collaboration.

Working closely with DynTek, WATG established 65 department portals for sharing information about such specialties as sustainable architecture or spa design. WATG plans to use its upgraded environment to streamline processes and knowledge transfer, thereby making the firm more effective overall.

- Expected annual cost savings of U.S.\$2,402,000. By automating many of its previously manual processes, WATG expects to realize significant savings.
- Ease of use. With its collaboration solution in place, WATG will no longer have as great a reliance on its IT staff for managing content.
- Improved knowledge sharing. Support for wikis and blogs makes it easier for employees to contribute their expertise to help educate others.
