

Application Platform Solutions

DynTek has developed industry based methodologies to address the Analysis, Design, Proof of Concept, Project Planning, Full Scale Deployment and Operations of a broad range of Microsoft® based solutions. We create solutions that focus on helping our customers realize the greatest value from their existing Microsoft software investment.

More than a Business. More than a Job. A Passion.

We live in beta software because we really couldn't stand to wait until Windows 7 and Office 2010 became available to the general public. We have those Seinfeld/Gates commercials saved to our hard drive (and actually enjoyed watching them). We rock to Zune HDs, not iPods - that's how serious we are about Microsoft technologies.

DynTek is committed to transferring knowledge, empowering you to master your Microsoft® technologies. We will work closely with your IT team and partners to ensure that all of your IT service needs are met. By leveraging our depth of experience, we help you meet today's IT challenges, set your business apart and achieve results from rock solid IT solutions.
