## **DynTek, Inc. Announces Divestiture of Secure Data Destruction and Disposal Operations**

**Irvine, CA – January 4, 2008 – DynTek, Inc. (DYNK.PK)**, a leading provider of professional technology services, today announced that it has divested its Secure Data Destruction and Disposal (SDDS) operations to AERC Recycling Solutions, one of the leading full-service recycling companies in the nation.

The terms of the sale include the transfer of DynTek’s proprietary secure asset management software program, related intellectual property and the company’s Statewide Secure Data Destruction contract with the Commonwealth of Virginia to AERC. AERC has served as DynTek’s primary subcontractor on the Virginia contract for the past three years.

“Our strategic focus is on growing, managing and supporting profitable field operations that align with our core competencies,” said Casper Zublin, Jr., DynTek’s chief executive officer. “SDDS is outside of our core business and as part of our operations it did not consistently contribute positive operating income. We do look forward to partnering with AERC on future SDDS opportunities within our customer base, including adding them as a service line on our GSA schedule.”

“DynTek’s SDDS operations are a perfect complement to Com-Cycle, our electronics recycling business unit,” said Peter J. Jegou, AERC and Com-Cycle’s chief executive officer. “With our business volume, solution focus and recycling sales and management expertise, we feel we can capitalize on this business through the expansion of opportunities within the Virginia SDDS contract and the use of the secure asset management software program in other areas as well.”

### **About AERC Recycling Solutions**

AERC Recycling Solutions has become an industry leader through our partnerships with our clients by providing unmatched convenience, regulatory compliance, and expert consulting to handle universal waste issues. Com-Cycle was started in 2001 by AERC to help service customers with electronics recycling needs. Com-Cycle offers complete computer and electronics recycling services with a Zero-Waste-to-Landfill policy. We offer compliance with Federal, State, and Local regulations as well as secure data destruction for your electronic data drives. We provide an array of services including Secure Data Destruction and Management, Total Asset Management and End of Life Electronics Management. Please visit [www.com-cycle.com](http://www.com-cycle.com) for more information.

### **About DynTek**

DynTek is a leading provider of professional technology services to mid-market companies, such as state and local governments, educational institutions and commercial entities in the largest IT markets nationwide. DynTek provides a broad range of IT security, unified communication, virtualization, Microsoft Information Worker, and application infrastructure and delivery solutions. DynTek's multidisciplinary approach allows our clients to turn to a single source for their most critical technology requirements. For more information, visit <http://www.dyntek.com>.

### **Forward Looking Statements**

*This press release contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbors created thereby. Investors are cautioned that certain statements in this press release are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and involve known and unknown risks, uncertainties and other factors. Such uncertainties and risks include, among others, success in reaching target markets for services and products in a highly competitive market and the ability to maintain existing and attract future customers; our ability to finance and sustain operations, including our ability to comply with the terms of working capital facilities and/or other term indebtedness of DynTek, and to extend such obligations when they become due, or to replace them with alternative financing; our ability to raise equity capital in the future; our ability to achieve profitability despite historical losses from operations; our ability to maintain business relationships with IT product vendors and our ability to procure products as necessary; the size and timing of additional significant orders and their fulfillment; the continuing desire of and available budgets for state and local governments to outsource to private contractors; our ability to successfully identify and integrate acquisitions; the retention of skilled professional staff and certain key executives; the performance of DynTek's government and commercial technology services; the continuation of general economic and business conditions that are conducive to outsourcing of IT services; and such other risks and uncertainties included in our Annual Report on Form 10-K filed on October 29, 2007, our Quarterly Report on Form 10-Q filed on November 19, 2007 and other SEC filings. DynTek has no obligation to publicly revise any forward-looking statements to reflect anticipated or unanticipated events or circumstances occurring after the date of such statements.*
