**DynTek's Microsoft Solutions Practice Continues Expansion
through the Addition of Networking Infrastructure and
Data Management Competencies**

Irvine, CA – January 29, 2008 – DynTek, Inc. (DYNK.PK), a leading provider of professional technology services, today announced that it has achieved Gold Certification in Microsoft's Networking Infrastructure Solutions and Data Management Solutions Competencies.

Companies achieve a Microsoft Gold Competency by demonstrating technical acumen and skill, documented real-world experience and high levels of customer satisfaction. The Networking Infrastructure Solutions Competency recognizes DynTek's expertise in the design, deployment, and customization of networking infrastructure solutions that include server solutions based on either the Microsoft Windows Server 2003 operating system or the Windows 2000 operating system.

DynTek's achievement of the Data Management Solutions Competency and Specialization is the result of the company's expertise in delivering migration tools and services, database administration tools and services and performance tools using SQL Server technology. This competency demonstrates that DynTek has the knowledge and capabilities to make SQL Server highly available and redundant, which is a critical customer need since these systems and databases store our customer's most important and often irreplaceable data and information.

DynTek also holds Microsoft Gold Certified Competencies in Advanced Infrastructure, Security and Information Worker Solutions.

“With five competencies and more pending, DynTek places high importance on our growth in the Microsoft Gold Certified Partner Program,” said Brian Gancharov, DynTek's Microsoft Advanced Infrastructure Solutions Director. “Our consultants strive to stay certified and well versed in the newest Microsoft technologies, such as Windows Server 2008 and Office Communications Server 2007. This commitment enables DynTek to quickly expand our service offerings and add additional competencies to the partnership, and most importantly, comprehensively address the needs of our clients. As a result, DynTek's Microsoft pipeline has more than doubled in the last year.”

About DynTek

DynTek is a leading provider of professional technology services to mid-market companies, such as state and local governments, educational institutions and commercial entities in the largest IT markets nationwide. DynTek provides a broad range of IT security, unified communication, virtualization, Microsoft Information Worker, and application infrastructure and delivery solutions. DynTek's multidisciplinary approach allows our clients to turn to a single source for their most critical technology requirements. For more information, visit <http://www.dyntek.com>.

Forward Looking Statements

This press release contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbors created thereby. Investors are cautioned that certain statements in this press release are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and involve known and unknown risks, uncertainties and other factors. Such uncertainties and risks include, among others, success in reaching target markets for services and products in a highly competitive market and the ability to maintain existing and attract future customers; our ability to finance and sustain operations, including our ability to comply with the terms of working capital facilities and/or other term indebtedness of DynTek, and to extend such obligations when they become due, or to replace them with alternative financing; our ability to raise equity capital in the future; our ability to achieve profitability despite historical losses from operations; our ability to maintain business relationships with IT product vendors and our ability to procure products as necessary; the size and timing of additional significant orders and their fulfillment; the continuing desire of and available budgets for state and local governments to outsource to private contractors; our ability to successfully identify and integrate acquisitions; the retention of skilled professional staff and certain key executives; the performance of DynTek's government and commercial technology services; the continuation of general economic and business conditions that are conducive to outsourcing of IT services; and such other risks and uncertainties included in our Annual Report on Form 10-K filed on October 29, 2007, our Quarterly Report on Form 10-Q filed on November 19, 2007 and other SEC filings. DynTek has no obligation to publicly revise any forward-looking statements to reflect anticipated or unanticipated events or circumstances occurring after the date of such statements.
