**DynTek Delivers Virtualized Server Environment to Mohawk Fine Papers**  
*Mohawk Recently Named Computerworld's #1 Green IT Company*

Irvine, CA – May 14, 2009 – DynTek, Inc. (DYNE.PK ), a leading provider of professional technology services, today announced it has successfully delivered a comprehensive virtualized server environment to Mohawk Fine Papers Inc, a global leader in the production of recycled, eco-friendly paper.

As part of its strategy of Environmental Stewardship, Mohawk engaged DynTek to create and implement a server virtualization solution that enabled the organization to eliminate 75% of its physical servers, reduce data center power load by 50%, decrease systems administration man-hours by 50% and save thousands of dollars per year in reduced cooling and power consumption. In addition, its new virtualized environment, which incorporated VMware technologies, Dell EqualLogic SANs, HP servers and Cisco switches, improved system performance and reliability, and enhanced infrastructure flexibility and agility to respond to dynamic business changes.

Mohawk was recently named the #1 Green IT company by Computerworld, thanks in part to the positive environmental impact of its virtualized environment.

Paul Stamas, Mohawk's Vice President of Information Technology, stated, "We heard the virtualization pitch from a multitude of vendors, but it wasn't until our meetings with DynTek's consultants, that the true possibilities began to formulate in our minds. DynTek helped us integrate the business view, the social view and the technical view into a solution that met all our sensibilities. They were professional, persistent and comfortably took a leadership role in the project. In addition, their technical competency is top notch."

**About DynTek**

DynTek is a leading provider of professional technology services to mid-market companies, such as state and local governments, educational institutions and commercial entities in the largest IT markets nationwide. DynTek provides a broad range of IT security, unified communication, virtualization, Microsoft Information Worker, and application infrastructure and delivery solutions. DynTek's multidisciplinary approach allows our clients to turn to a single source for their most critical technology requirements. For more information, visit <http://www.dyntek.com>.
