DynTek Announces Expanded Partnership with Microsoft and Citrix

V-Alliance Provides Citrix and Microsoft Partners the ability to reach new markets through this strategic partnership

Newport Beach, CA – October 6, 2010 – DynTek, Inc. (DYNE.PK) announced today that the company is working with Microsoft and Citrix in an expanded scope through the global partnership called V-Alliance to deliver a comprehensive set of virtualization solutions to address customers’ desktop and server virtualization needs.

DynTek sees Microsoft and Citrix emerging as the clear winner in virtualization and cloud computing. Their Microsoft/Citrix virtualization practices are profitable and growing rapidly as their customers embrace Microsoft’s and Citrix’s broadest set of virtualized solutions across the datacenter and desktop. DynTek will focus their investment and practice development around the Microsoft and Citrix Virtualization and Cloud Strategy. Microsoft and Citrix have been great partners in helping create new opportunities, growing customer awareness, and building a truly committed strategic partnership.

“Our customers are looking for desktop, server and application virtualization technologies that are cost effective and industry leading – the combination of Citrix and Microsoft provides them just that,” said Ken Young, Managing Director for DynTek. “We are excited about what this new program will provide our customers as well as our technical delivery teams. We have been delivering virtualization technologies from Citrix and Microsoft for several years now – and V-Alliance allows us to take our offerings to the next level.”

“We are continually looking for ways to work with Microsoft to add value to our joint channel,” said Tom Flink, Vice President, Channel and Emerging Products for Citrix. “V-Alliance is the latest effort to do just that. This program will give our joint partners the information and resources they need, so they may more effectively deliver the kinds of virtualization solutions that the market is looking for.”

“The Microsoft-Citrix relationship which goes back more than two decades has always been about delivering solutions that enable our customers to be more productive,” said Ross Brown, Vice President, Worldwide Partner Sales for Microsoft. “V-Alliance is our latest effort to ensure that our joint partners around the world are always fully equipped to deliver the broadest array of virtual computing solutions to the market that only Microsoft and Citrix can offer.”

Forward Looking Statements

This press release contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbors created thereby. Investors are cautioned that certain statements in this press release are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and involve known and unknown risks, uncertainties and other factors. Such uncertainties and risks include, among others, success in reaching target markets for services and products in a highly competitive market and the ability to maintain existing and attract future customers; our ability to finance and sustain operations, including our ability to comply with the terms of working capital facilities and/or other term indebtedness of DynTek, and to extend such obligations when they become due, or to replace them with alternative financing; our ability to raise equity capital in the future; our ability to achieve profitability despite historical losses from operations; our ability to maintain business relationships with IT product vendors and our ability to procure products as necessary; the size and timing of additional significant orders and their fulfillment; the continuing desire of and available budgets for state and local governments to outsource to private contractors; our ability to successfully identify and integrate acquisitions; the retention of skilled professional staff and certain key executives; the performance of DynTek's government and commercial technology services; the continuation of general economic and business conditions that are conducive to outsourcing of IT services; and such other risks and uncertainties included in our Annual Report on Form 10-K filed on October 29, 2007, our Quarterly Report on Form 10-Q filed on November 19, 2007 and other SEC filings. DynTek has no obligation to publicly revise any forward-looking statements to reflect anticipated or unanticipated events or circumstances occurring after the date of such statements.
