

ROADMAP TO CLOUD EFFICIENCY

FOR STATE AND LOCAL GOVERNMENTS

DISASTER RECOVERY

Azure Site Recovery can deliver seamless cloud infrastructure scalability, data replication, and enhanced uptime while providing new capabilities and efficiencies at a lower cost.

COLLABORATION

Office 365 can help governments trade in legacy phone systems for cloud-integrated voice, HD video, conferencing, and IM communications that work across desktops and mobile devices.

E-DISCOVERY

The advanced eDiscovery features in Office 365 streamline Freedom of Information requests while ensuring quick, compliant access, management, and retrieval of litigation-ready data.

MOBILITY, IDENTITY & RIGHTS MANAGEMENT

Powerful encryption and advanced threat protection are among the key features that makes the Microsoft Enterprise Mobility Suite ideal for providing secure data access to the right people at the right time.

VIDEO CLOUD STORAGE & ACCESS

Azure Media Services mitigate the challenges of meeting legal requirements for video storage by enabling continuous access to cross-agency video surveillance, arraignments, and visitations.

CLOUD GROWTH BY 2020

28%
